

IT Services and Support for Restaurants and Cafes

Let us be the Secret Recipe for Your Success

Success in the restaurant industry depends on more than a great menu and killer ambiance. It requires technology solutions that connect your patrons, waitstaff, kitchen, and back office so seamlessly that it is, ideally, never noticed. Your IT system tracks your inventory, scheduling, and reconciles your register drawers. You wouldn't trust just anyone with your recipes; your technology is no different.

A Team with the Skills To Keep Your Registers Ringing.

We can help with the following:

Managed Wi-Fi

Reliable Wi-Fi allows your patrons to post their #foodie shots, your servers to enter orders on mobile POS devices, and the kitchen to receive tickets in real-time, take online orders, and process credit cards.

Mobile Device Management

We can recommend and help you maintain mobile POS devices and infrastructure for wait staff to make real time orders.

Secure Network Infrastructure

Alongside your kitchen equipment, the hardware and software that makes up your technology infrastructure keeps your business moving. Your POS system, order board, and online ordering system need to work reliably and be connected in the most efficient way.

Backup & Recovery

Mistakes or computer failures can happen unexpectedly. You can rely on us to set up regular automatic backups and data recovery processes when accidents, computer errors, and power outages happen.

24/7 IT Support

We all know what it's like to have technology issues interrupt our day. With FSA those interruptions are practically eliminated, and if something does happen that stands between you and z-ing out at the end of a long night, we're here to help.

Business Phone

Voice over Internet Protocol (VoIP) service ensures that your customers can always reach you for questions, take-out orders, and reservations. Connect them through a centralized phone system with intercom functionality if you have multiple locations.

We all know what it's like to have technology interrupt our businesses. With FSA those interruptions are practically eliminated, and if something does happen, you know we're here to help.
